

PART A - Project overview

A.1 Project identification

Programme priority	Priority 1 - Innovative Alpine Space
Programme priority specific objective	SO1.1 - Improve the framework conditions for innovation in the Alpine Space
Project acronym	ASIS
Project title	Alpine Social Innovation Strategy
Project number	681
Name of the lead partner organisation/original language	Chaire d'entrepreneuriat en Économie Sociale et Solidaire de l'université Lyon 2
Name of the lead partner organisation/English	Chair of entrepreneurship in Social and Solidarity Economy of Lyon2 University
Project duration 36 months 0 days	Start date
	Closure date
	2018-04-17
	2021-04-16

A.2 Project summary

Please give a short overview of the project (in the style of a press release) and describe:

- the common challenge you are jointly tackling in the project;
- the main objective of the project and the expected change the project will make to the current situation;
- what makes the project innovative;
- the main outputs you will produce and who will benefit from them, also after the end of the project;
- the approach you plan to take to tackle the identified challenges;
- the added value of the transnational approach: why do you plan to work at transnational level?

ASIS project objective is to initiate, develop and promote a new vision of innovation in the Alpine space area that is Social Innovation (SI), in order to increase the innovation capacity of Alpine space regions by answering to the new challenges. ASIS means "Alpine Social Innovation Strategy". ASIS consortium would like to develop a new approach of innovation that really answers to economic and societal challenges met by each Alpine region. Alpine space (ASP) is a really dynamic territory in term of research, innovative projects and SI initiatives, but shows limited inter-Alpine cooperation and significant regional and social disparities. Then, as all European regions, the ASP area meets crucial challenges, like climate change, socio-demographic changes, migrations, economic disparities. Technological innovation cannot itself answers to all the economic and social challenges of the ASP area anymore. SI is considered as a crucial soft location factor for generations and economic development. SI creates the human potential and capacity for technological and service innovation and is a driver for wellbeing. For that, it has become necessary to carry out the following actions: to develop public policies and an adequate ecosystem capable of providing effective support for SI (GECES report, European Commission, 10/2016) & to promote a shift from a project-based approach to long-term strategies that include SI. ASIS project desires to boost a real change and will develop an improved cooperation between ASP innovation key actors, better adapted answers to societal ASP challenges and new knowledges & skills of public authorities, business support organisations & sectoral agencies levels. To support this change, ASIS will propose new tools and methodologies, an innovative platform, new strategic policies & recommendations to public actors through a white book, Simulation models & many other materials. SIS new strategy will use findings of existing ASP projects & SI research.

A.3 Project budget summary

ERDF

Partner		Programme Co-financing		Contribution	Total Eligible Budget
Partner	Country	ERDF	ERDF Co-Financing(%)	Total Contribution

A.4 Project outputs

Overview table on project outputs as defined in the work plan					
Programme output indicators	Project output indicator targets	Measurement Unit	Project output quantification (target)	Project output number	Project output (title)
OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	6,00	Number	1,00	T1.1.1	A new and shared SI concept
			1,00	T2.1.1	Proposition of a shared ASP strategy framework
			1,00	T4.1.1	Simulation model, Software and Handbook
			1,00	T4.2.1	Risk assessment simulation model and Evaluation QM-system
			1,00	T5.1.1	White book on SI public policies
			1,00	T5.2.1	Operational SI ASP strategy
OI1.1.3 - Number of developed implementation elements improving the framework conditions for innovation	14,00	Number	12,00	T3.1.1	SI knowledge materials: trainings, guideline, platform
			1,00	T5.1.2	White book on SI public policies
			1,00	T5.2.2	Operational SI ASP strategy

PART B - Project partners and observers

B.1 Project Partners

Lead partner 1

Partner role in the project	LP
Name of the organisation in original language	Chaire d'entrepreneuriat en Économie Sociale et Solidaire de l'université Lyon 2
Name of the organisation in English	Chair of entrepreneurship in Social and Solidarity Economy of Lyon2 University
Abbreviation of the organisation	Chaire ESS - Lyon 2
Department/unit/division in English	Faculty of Economy and management
Country (NUTS 0)	FR, FRANCE
Region (NUTS 2)	FR71, Rhône-Alpes
Sub-region (NUTS 3)	FR716, Rhône
Postcode and City	69007 LYON
Street	Quai Claude Bernard 18
Homepage	https://chaireess.univ-lyon2.fr/
Type of partner	higher education and research
Legal status	public
Co-financing source	ERDF
Co-financing rate (%)	85.00
VAT number	
Entitled to recover VAT?	no
Legal representative firstname	Nathalie
Legal representative lastname	DOMPNIER
Legal representative email	nathalie.dompnier@univ-lyon2.fr
Legal representative telephone	+33 6 16 24 22 31
Contact person firstname	Said
Contact person lastname	Yahiaoui
Contact person email	Said.Yahiaoui@univ-lyon2.fr
Contact Person Telephone	+33 6 16 24 22 31
Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	The chair "Entrepreneurship in Social and Solidarity Economy" regroups some of the most important actors of Social and Solidarity Economy in the Rhone Alpes Region. Together with the University Lyon II and 22 organisations, the Chaire ESS works actively to develop entrepreneurship in SSE, improve the visibility of the sector and to produce an original and alternative ideas for SSE. The Chair is the most active in the region on social innovation research and actions. Its goal is to contribute actively to scientific & social debates on SI and SEE. it works closely with public entities, like Lyon city, on these questions. Several qualified laboratories will be involved in the project. Then, the Lyon 2 University is really active in European cooperation field. The chair is directly linked with a master degree of social and solidarity economy of Lyon 2 University. Last conference: Social transformation through social innovation: the elements of an institutionalist approach
What is the partner's role and responsibility in the project?	The technical and scientific coordination of th project. Responsible of WPT1 & WPM, will participate in WPT2, WPT3, WPT4, WPT5 and WPC.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	TEMPUS PROJECT (530349-TEMPUS-1-2012-1-FR-TEMPUS-JPHES): Inter-university Start-up centers for students' innovations development & promotion (SUCSID) with France, Sweeden, Portugal, Finland, Great Britain for PRC'S Ukraine, Belarus, MOLDOVA.

Project partner 2

Partner role in the project	PP
Name of the organisation in original language	OXALIS SCOP CAE
Name of the organisation in English	OXALIS SCOP
Abbreviation of the organisation	OXALIS
Department/unit/division in English	PRID department (project research innovation development) and MEDCOOP, Régional action on Social innovation and european cooperation.
Country (NUTS 0)	FR, FRANCE
Region (NUTS 2)	FR71, Rhône-Alpes
Sub-region (NUTS 3)	FR717, Savoie
Postcode and City	73100 AIX LES BAINS
Street	Boulevard du président Wilson 603
Homepage	http://www.oxalis-scop.fr/
Type of partner	SME
Legal status	private
Co-financing source	ERDF
Co-financing rate (%)	85.00
VAT number	FR 41 410 829 477
Entitled to recover VAT?	yes
Other national identifying number	
Type of identifying number	
Legal representative firstname	Stéphane
Legal representative lastname	RIDEL
Legal representative email	s.ridel@oxalis-scop.org
Legal representative telephone	0450244455
Contact person firstname	Christine
Contact person lastname	ANDRE
Contact person email	c.andre@oxalis-scop.org
Contact Person Telephone	0667004341
Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	Oxalis is a new actor of Social innovation (SI) in Rhone-Alpes region, by experimenting initiatives since 20 years in this field. Oxalis is itself an innovative form of cooperative that works differently & gather many experts in SI and social economy. Oxalis initiates policy pilot actions at regional level, in cooperation with the other regional actors (incubators, economic chambers or clusters). Oxalis coordinates the regional action "MEDCOOP" since 3 years, with the support of regional authorities, as a contribution to public policies = Medcoop goal is to encourage SI & European cooperation. Guidelines on SI and an annual event (Your innovation day) are some outputs of this action (http://www.yourinnovationday.eu/). Many efforts have to be done to better include social innovation in actual support schemes dedicated to innovation & in actual public policies, that consider this topic separately and do not really realize the impact SI can have on regional challenges, especially in ASP
What is the partner's role and responsibility in the project?	Responsible of administrative, financial & legal management (management procedures, reports...). Responsible of WPC. Development of the platform. Participation to the definition of SI (WPT1) and to public policies recommendations (WPT5)
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	Oxalis has been part of many European projects such as: INTERREG MED ICS MED, INTERREG MED CITEK, COSME Erasmus for Young entrepreneurs as coordinator, Erasmus plus EDEA as coordinator & EMBRACE, among others. Regional action MEDCOOP on social innovation

Project partner 3

Partner role in the project	PP
Name of the organisation in original language	Fachhochschule Kärnten – gemeinnützige Privatstiftung
Name of the organisation in English	Carinthia University of Applied Sciences
Abbreviation of the organisation	CUAS
Department/unit/division in English	School of Management School of Health Sciences & Social Work
Country (NUTS 0)	AT, ÖSTERREICH
Region (NUTS 2)	AT21, Kärnten
Sub-region (NUTS 3)	AT212, Oberkärnten
Postcode and City	9800 Spital an der Drau
Street	Villacher Straße 1
Homepage	https://www.fh-kaernten.at/en/about-cuas/organisation/cuas-carinthia-university-of-applied-sciences/
Type of partner	higher education and research
Legal status	public
Co-financing source	ERDF
Co-financing rate (%)	85.00
VAT number	ATU53233709
Entitled to recover VAT?	no
Other national identifying number	
Type of identifying number	
Legal representative firstname	Siegfried
Legal representative lastname	Spanz
Legal representative email	forschung@fh-kaernten.at
Legal representative telephone	0043 (0) 5 90500-7030
Contact person firstname	FH-Prof. Dr. Dietmar
Contact person lastname	Brodel
Contact person email	d.brodel@fh-kaernten.at
Contact Person Telephone	0043 (0) 5 90500-2400
Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	CUAS has carried out more than 140 local, regional, national & European research projects with approximately 150 partners of the public, private & civil sectors in 2016. The success shows the organization's experience in the implementation of research projects- especially EU co-financed projects Social innovation related projects: Establishment of the very successful worldwide Innovation Congress - Research and implementation of innovation solutions in the fields of engineering (winner of the Robocup), aging (establishment of the Institute for Applied Research on Ageing), local and regional innovation (establishment of cross-border benchmarking model for public services, regional integration projects and political education for youngsters, improvement of public administration structures) and SI (AMIF funded, main focus to improve integrations strategies). Role knowledge and network of regional actors, research & practical experience in SI, working on the above mentioned project outputs
What is the partner's role and responsibility in the project?	Responsible of WPT4 Simulation model. Leading the WP, Assessment of funding principles, Development of Method and Criteria and Instrument. Development of Simulation model. Active participation in WPT1, 2, 3, 5, M & C.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	Interreg: Alpe Adria Coworking, SI-K EXPORTCOOP SEE, BENCH-PA, CELSA, SMART PRODUCTION, AKKU4FUTURE, Care4Tech; Erasmus: SPIMT, KoWist, DevCORE, POSADEM, ELLAN, FLEXCELL; LIFE+: CEMOBILE; Leonardo da Vinci: PAT-TEIN, NEXT4PA; Horizon 2020: PATHWAYS, STEVE; AMIF: MIGRA-IN

Project partner 4

Partner role in the project	PP
Name of the organisation in original language	Steinbeis 2i GmbH
Name of the organisation in English	Steinbeis 2i Ltd

Contact Person Telephone	00386 3 747 13 00
Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	We are lead partner of the Local Action Group "From Pohorje to Bohor" & use innovative approaches to achieve development goals. Partners in the project TELI2 (Erasmus+). Goal: to carry out research on the delivery of LEADER in member states and training needs of LEADER staff and Board members, to deliver an innovative best practice-based training course. Regarding sustainable tourism we set building blocks, challenges & Advice for testing & implementation of new destination business models/optimization of existing ones. Cooperation with various local partners in above mentioned activities to make our destination stand out on the map of innovative European regions. We implement the trends of the new technological revolution into smart villages. Rural areas are slow to follow urban areas & we are searching for innovative solutions in models of short food chains, social entrepreneurship & circular economy. We initiate new approaches for development of innovative services & processes
What is the partner's role and responsibility in the project?	Participation to WPT1, WPT2, WPT3, WPT4, WPC & WPM : SI definition and ASP strategy on SI; Creation of a guideline on SI; Testing of the tools, methods and new funding models; Creation of newsletters.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	A lot of experience with management, implementation and reporting of EU projects. Lead partner in project Play! (OP Slovenia-Croatia), partner in project Traditional and Wild (Interreg Central Europe), partner in project Ride&Bike (OP Slovenia-Croatia).

Project partner 6

Partner role in the project	PP
Name of the organisation in original language	Kulturno gospodarsko središče evropskih vesoljskih tehnologij (KSEVT)

Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	Lyon city is a major player of social innovation since 2001. We support the new actors of the sector (incubators of social innovation, activity and employment cooperatives, Territorial Economic Cooperation Centers on sustainable food, circular economy, citizen incubators), we welcome the entrepreneurs of innovative projects. We are federating innovative initiatives in the field of sustainable food, with France's first territorial food governance body, and a plan of 50 actions designed with the players in the field (URBACT program "sustainable food in urban communities"). Lyon is developing a unique territorial quality label: "Lyon, a fair and sustainable city", which brings together 200 exemplary structures in sustainable development field in a club dedicated to cooperation. Lyon is the only city in France associated with the guidance council of the chaire ESS (lead partner).
What is the partner's role and responsibility in the project?	We will especially work on SO1 and SO3. We want our city to be an experimentation place for new SI innovation's experimentations, in relationship with our university. We wish to compare those experimentations with our partners in Torino. Participation in WPT1, WPT2, WPT3, WPT4, WPT5, WPC & WPM.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	We were involved in a URBACT2 project („sustainable food in urban communities“).

Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	Austrian Standards Institute is an internationally renowned member of the European Committee for Standardization (CEN) & the International Organization for Standardization (ISO) as well as the National Standards Organization of the European Telecommunications Standards Institute (ETSI). It supports stakeholders in the development of standards for the domestic, European & global market. These stakeholders represent the interests of the economy, consumers, research, administration & society. Additionally Austrian Standards Institute provides the secretariat of several European & International standardization committees & is involved in different national & EU-funded research projects on quality in mobility management in small/medium sized cities or on bridging the gap between innovation, research & standardisation for improved dissemination of research results & better alignment of innovation with potential user expectations in a structured, systematic process of stakeholder involvements
What is the partner's role and responsibility in the project?	Screening of EU & INTL standards relevant for the project; Identifying standardization potential of project results; Identification of & engaging with relevant stakeholders; Using standards & standardization as dissemination channels. WPT1, 3, 4, C & M.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	MAX, Quality management in mobility management (FP6), IRIS. Integrated European Industrial Risk Reduction System (FP7), CIRRUS, Certification, Internationalisation and standardization in cloud Security (FP7).

Which are the partner's thematic competences and experiences relevant for the project? What are the institutional role and policy addressing capacity of the partners?	The Laboratory of Visual Culture (LCV) has a research team with knowledge & competences of bottom-up innovation models and community-driven approaches in design research and education. LCV leads SI projects on environmental sustainability and energy consumption, and international programs on interaction design & interactive cinema. Within EU funded projects, LCV designed and distributed trainings for supporting the growth of the European digital SI network. Also, LCV defined a toolkit including guidelines & resources to guide the scale up of SI projects. Knowledge & competences on the definition of guidelines & development of tools have been applied in other research projects on SI regarding the energy consumption (SocialPower, Gebert R�f Stiftung), sustainable mobility (Goeco, SNSF). In 2012, LCV founded a fablab, a fabrication laboratory connected with the Swiss fablab network, that promotes bottom-up approaches to the realization of tech projects based on open & SI business models.
What is the partner's role and responsibility in the project?	Definition of the common vision of SI (WPT1), definition of the challenges (WPT2), development of the training and tools (WPT3), simulation model (WPT4), adaptation of public policies to SI challenges (WPT5), implementation of the communication (WPC), dissemination and transfer activities.
If applicable, describe the organisation's experience in participating in and/or managing EU co-financed projects or other international projects.	DSI4EU, coord action of Horizon2020, CAPSSI Collective Awareness Platforms for Social and Sustainable innovation. CCAIps - Creative Companies in Alpine Space, INTERREG IIIB Mobile Access to Knowledge: Culture and Safety in Africa, funded by Swiss Network for Intl Studies

Please describe why the observer institution is interested in the project.	Co-create a shared vision of the social innovation. Après-Ge is a pioneer on this themes and by embarking a maximum of people within this shared vision the more impact we will have.
What is the benefit for the organisation from participating in the project?	To be inspire of the projet's process and outcomes. We wish to encourage large-scale transnational projets on this topic and influence public policies to support this matter.

PART C - Project description

C.1 Project relevance

<i>What are the common territorial challenges and/or joint assets that will be tackled by the project?</i>
ASP is a really dynamic territory for research, innovative projects & social innovation (SI) initiatives, but shows limited cooperation & significant regional & social disparities (regional similarities but lack of networking to boost real scale change). Policies on innovation always focus on technological innovation (TI) but TI cannot itself answers to all economic & social challenges of ASP area (climate changes, social disparities). SI contributes as an important Soft Location Factor to sustainable economic dev of territories & answers ASP challenges thanks to new forms of innovation. We need to encourage public policies & economic agencies to evolve & integrate SI in all innovation areas. This new vision of innovation is not shared/well developed in ASP. ASIS will define a common strategy to change visions. Many regions face important issues on Migration, Generations, Digitalization, Economy. A common vision will allow ASP actors to propose common answers to these challenges.
<i>What is the project's approach and why is transnational cooperation needed to address these common challenges and/or joint assets? What is innovative about the project's approach?</i>
Approach: to develop public policies & adequate ecosystem providing effective support for SI, to promote long-term strategies that include SI & to increase ASP cooperation on SI concept by gathering new actors. Activities: 1. Develop a common SI vision in ASP area 2. Analysis/definition of a strategy for SI support. 3. Tools & methods to support SI, transnational platform. 4. Test/evaluation/implementation by public actors. 5. Work on a White book with target groups on SI policies, Criterion Catalogue & Simulation models. Transnational added value: a regional answer is inefficient as challenges are transnational. A shared vision/framework is needed to improve SI in all ASP area, duplicates results & contribute to a smart, sustainable & inclusive growth at ASP level. It will be the 1st project on that topic, we never studied SI as a new vision for innovation, only considered in the prism of General Interest services until now. Approach totally goes beyond existing practices as it changes it

C.2 Project focus

C.2.1 Project objectives, expected result and outputs

Programme priority specific objective

Programme priority specific objective	SO1.1 - Improve the framework conditions for innovation in the Alpine Space
---------------------------------------	---

Project overall objective

<i>What is the overall objective of the project? How does it contribute to the programme's objective?</i>
ASIS objective is to initiate, develop & promote a new vision of innovation in the ASP area that is Social Innovation, in order to increase the innovation capacity of ASP regions by answering to the new challenges. In other words, the main objective is to develop a new approach of innovation that really answers to societal challenges met by each ASP region. ASIS will contribute to the objectives of the ASP program by improving framework conditions for innovation & by delivering strategic tools & methods to encourage a new vision of innovation in ASP area, with an impact that is beyond all other past proposed ideas, with a sustainable long term achievement focusing on SI as a crucial Soft Location factor for economic development & wellbeing

Programme result

<i>Select one programme result indicator your project will contribute to:</i>
Level of maturity of framework conditions for innovation for generating innovation processes among business, academia and administration

Project result(s)

<i>What is/are the project's main result(s) and how do they contribute to the programme result indicator?</i>
Support organisations/sectoral agencies well equipped to better support SI through new tools, guides & funding models. New knowledges/skills for public authorities & Support org/sectoral agencies. Level of quality of framework conditions for innovation increased by giving strategic & implementation elements to new actors. Innovation public policies more adapted & receptive to SI initiatives & ASP societal challenges (improved answers). An economic development of territories encouraged thanks to more adapted support schemes & policies to the reality of what should be innovation today: an answer to social challenges. Improved cooperation between new actors by sharing the same SI vision: more economic activity & ASP transnational SI initiatives

Project specific objectives

<i>Which are the specific objectives the project will be working towards? Define max. 3 project specific objectives.</i>	
Title of specific objective	Please provide a short explanation on the link with the project outputs
SO1: To provide public authorities, business support organisations & sectoral agencies with common criterias/concept of SI between ASP regions in order to create a common vision of SI & initiate 1st steps to develop a shared SI strategy for economic devpt	To contribute to a «common vision of innovation in ASP area» (EUSALP prog), partners have 1st to share on the concept&vision of SI, be sure we all speak about the same thing. Report on SI concept in ASP area (OT1) to which partners/observers will contribute (cooperative/transnational work) will answer to this objective. The Proposition of a shared ASP strategy framework (OT2) will give to public authorities, support organisations & sectoral agencies keys to develop a policy & support SI actions
SO 2: Propose new tools, methodologies and guidelines in order to help business support organisations and sectoral agencies to better support sustainable and Social Innovation projects and improve cooperation between them on that topic	Thanks to the reports/outputs produced during the Action 1, partners will create & experiment (pilot actions) guidelines and other dedicated tools on how to support and develop social innovation = implementation elements for supporting innovation and improving the framework conditions for social innovation. The concerned outputs are SI knowledge materials (including tools and guidelines, web-training and web-platform) (OT3)
SO 3: Give recommendations to public authorities on how to adapt public policies to social innovation challenges through a «white book» and how to support funding bodies in a new approach of funding principles	Public policies and support actions implemented by support organisations and regional agencies are totally linked. After having equipped them to better support SI, it is fundamental to design new strategic policies on SI and help public authorities to well appropriate this new strategy. A white book (OT4), a simulation models (OT5) and SI School (OT6) will be proposed. Researchers, political decision-makers, agencies, observers will be included in this phase

C.2.2 Project outputs

<i>What will be the outputs the project will produce?</i>
SO1: Report on SI concept (OT1): Common SI criterias/definition shared by ASP regions. Qualified analysis on SI challenges & concept. Shared ASP strategy framework (OT2): Strategic advices on how to develop a SI policy & propose support actions. SO2: SI knowledge materials (OT3): proposes a platform, trainings, guidelines on how to develop SI, implementation elements to support innovation/improve SI framework conditions. Tools & methodologies design & exploration phase with target groups to test&adapt them (pilot action). SO3: White book on SI & Public strategic policies (OT4): how to build & apply an efficient SI strategic policy to allow expected impacts to materialize, Criterion Catalogue & recommendation on funding procedures. Simulation model for project development (OS5): tool for evaluation of innovative projects with a sustainable social impact. SI School (OT6): pilot action to allow employees of public authorities & organisations to well understand & use all the tools

C.2.3 Target groups

<i>Which are the direct target groups of the project?</i>
1. The business support organisations = Chamber of commerce, clusters and other similar organisations that meet SI projects and follow innovation on the territories. 2. Sectoral economic promotion agencies and others = regional economic agencies that contribute to the regional economic developments of each ASP regions. 3. The public authorities (State, regions and municipalities) = the regional and local strategic public policies are directly included and concerned by ASIS project. 4. The enterprises, SMEs & in general public/private actors that develop innovative projects: this target group will benefit directly of the results and impact of the project and will have access to the project outputs that will be freely disseminated through the online SI platform. 5. The ASP programme: The shared ASP strategy framework for SI concerns European institutions including this programme. 6. Higher education & research: They will have access to ASIS outputs & results & continue research

Target groups	Please further specify the target groups	Target value
local public authority	Big & middle cities are concerned by SI public policies & propose support schemes on their territories. ASIS develops tools and policies for them. Cities are represented in the consortium & will be invited as stakeholders during project life.	50,00
regional public authority	ASP Regional authorities are involved in the project through partners or with the observer status. In addition, we will involve other ASP and outside ASP countries too during consultations/questionnaires of WPT1, 2, 4 & 5 to ensure transferability.results	18,00
national public authority	national Slovenian authorities are involved as observers. For the other ASP regions, partners will contact and involve as much as possible national level to ensure better dissemination and impact of ASIS results. Participation to national events.	7,00
sectoral agency	In each region involved through consultations (18), we can easily identify and contact 2 sectoral agencies during ASIS studies, in addition to the sectoral agencies already included in the partnership & observers. they will be invited to ASIS events too.	36,00
business support organisation	In each region involved through consultations (18), we can easily identify & contact 2 business organisations during ASIS studies, in addition to organisations already included in the partnership & observers. they will be invited to ASIS events too.	36,00
higher education and research	Deliverables & outputs of ASIS project will be disseminated largely to universities, research centers, transfer centers, thanks to partners networks and to ASIS platform, inside and outside ASP regions.	40,00
Other	European expert groups and INTERREG Alpine Space programme directly, during the ASP strategy framework for social innovation. We can involve 4 or 5 experts groups + the ASP programme	6,00
interest groups including NGOs	Such target group is represented in the observers list too. It can be any group interested in SI regarding their own activities or missions. They will receive ASIS information thanks to newsletters, invitations to public events & access to ASIS platform	100,00
enterprise, excluding SME	Enterprises & SME can use ASIS outputs. They can be inspired by ASIS strategies and tools & initiate changes at local level. They will be reached through innovation support organisations & economic agencies networks & can have newsletters & platform access	100,00
SME	Enterprises & SME can use ASIS outputs. They can be inspired by ASIS strategies and tools & initiate changes at local level. They will be reached through innovation support organisations & economic agencies networks & can have newsletters & platform access	100,00

C.3 Project context

C.3.1 Project contribution to wider strategies and policies

How does the project contribute to the wider strategies and policies?

ASIS refers to Projects with 1.a focus on strategic policy development & 2.a focus on explorative & piloting activities. ASIS contributes to EUSALP Innovation Strategies improvement by including SI in strategic pillars, by better representing SI in Innovation process & Standards & by proposing a new approach compared to other ASP proposals. ASIS contributes to EUSALP Action 1 strategy (identification of key strategic sectors where cooperation can impact either in economic or societal terms) & improves it by exploring new SI approaches & sectors which is of crucial contribution for economic growth. It enhances wellbeing & contributes to an effective Innovation eco-system. ASIS contributes to EU policies, as EU underlines insufficient knowledges, limited supports for SI & poor methods to encourage it (BEPA & GECES reports, Communication COM(2013)83...). ASIS contributes to ASP regional strategies by creating a new way to encourage innovation to collectively respond to societal challenges.

C.3.2 Macro-regional strategy contribution

Indicate how the project contributes to the EU Strategy for the Alpine Region (EUSALP).

ASIS contributes to EUSALP Action 1 strategy (identification of key strategic sectors where cooperation can impact either in economic or societal terms) & improves it by proposing new SI approaches & public policies to complete R&I current policies. ASIS will contribute to the improvement of transnational cooperation on S3. SI concerns many sectors, so ASIS will increase the economic potential of many sectors by giving tools & trainings to support organizations/clusters to improve their actions.

C.3.3 Synergies

What are the synergies with past or current EU and other projects or initiatives the project makes use of?

ASIS will review the EU-ASP projects for sustainable success & define success factors. It will use project data from the data pool of the ASPProgram & show which projects have & still contribute to regional sustainable developments, taking into account a societal impact that may not have been the main objective of previous projects. Study & contribution to ongoing projects like AlpGov. However, it would be important to assess the wider impact of individual projects and the development of social innovation concepts in regions, as SI is based more on individual initiatives than regional instigations. There is important differences between ASP regions on public policies and development of SI initiatives. That is why ASIS work packages will start by a state of the art including past and current regional/local projects analysis and partners experiences (like Steinbeis with the Danube transfer Centres or Oxalis with the Regional Action MEDCOOP and CITEK & ICSMED projects in MED area).

C.3.4 Knowledge

How does the project build on available knowledge?

Each ASP region defined its own Social innovation criteria and public policies. ASIS project will start with a state of the art based on all the available knowledge (background) at european, regional & local levels and on the many European publications and researches on this topic. The analysis will include available results of former ASP projects in term of sustainability & will give us pre-defined performance indicators. Partners involved in the project have a wide range of experience related to the methodological and practical challenges related to the implementation of SI in a societal context. Then they have a broad range of experience as well as methodological, theoretical and practical knowledge in the tasks of the project, e.g. simulation models, data governance, the design of recommendations for public policies. Access to available knowledge is totally guaranteed with 3 universities in addition in the consortium and many observers who will contribute to the knowledge access.

C.4 Horizontal principles

Horizontal principles	Description of the contribution	Type of contribution
Sustainable development (environment)	ASIS will focus on an impact assessment of former ASP projects and their contribution to a social sustainable development. Existing SI strategies in all regions will be studied. A common sustainable SI strategy for the entire AS will be developed	positive
Equal opportunity and non-discrimination	ASIS will evaluate social value creation by means of commercial, marketbased activities in the context of Innovation&Growth in the ASP based on data of former projects and other sources, no matter from which area of growth and social background	positive
Equality between men and women	ASIS will not distinguish between genders. However, gender issues have to be analysed more sensitive in the context of Social Entrepreneurship to build a sustainable Social Innovation Strategy. The focus is on more Gender equality in Innovation & Growth	positive

C.5 Work plan per work packages

Type: Preparation

WP Nr	WP Title	WP start date	WP end date	WP Budget
P	Preparation	2017-04	2018-04	20.000,00

Provide an overview how the project management will be organised: general structure and procedures, share of responsibilities, if project management will be externalised.				
P1 & P2 aim at properly initiating management tools, running monitoring procedures & assisting all partners for optimal performance & reporting up to the Project end. They'll provide & maintain tools & procedures required to manage, keep record of operational/ adm/financial/legal issues & implement governance structure: Steering Committee, Advisory Board (WP leaders) & ASIS Management team. P1:ASIS technical coordination. P2:ASIS management. Project Handbook defines procedures/responsibilities.				

Please describe activities and deliverables within the work package			
Activity A.M.1	Technical coordination of ASIS	2018.04	2021.04
P1 is in charge of the overall coordination of ASIS. This includes: Coordination of all WPs: Coordinator supervises this work considering the global strategy & ASIS objectives - Proposition of corrective measures in case of deviations to the Work plan, thanks to Project risk analysis validated & updated by the SC - Regular communication with the ASP program - Preparation/submission of technical reports - implementation & coordination of governance bodies: SC & AB (recommendations by WPs leaders)			
Deliverable D.M.1.1	Risk analysis		1,00
Determination of the internal and external project risks (probability/impact/severity) identified by the Coordinator, discussed at SC meetings with all partners and updated on a 6 monthly basis. Proposition of contingenc plan for each identified risk.			
Activity A.M.2	Controlling by Project management team	2018.04	2021.04
Administrative/financial /communication/legal management by P2: updating budgets, controlling resources consumption (time/expenses) of all on a quarterly basis vs provisional period budgets, identifying deviations & corrective actions, collecting copies of accounting documents/certificates, preparing periodic reports with comments/suggestions to SC, organizing project meetings, developing tools&procedures dedicated to reporting, writing of the Project Handbook, controlling agreements compliance			
Deliverable D.M.2.1	Management Package		0,00
Development of professional tools and documents for consortium financial et technical reporting = expenses tables, timesheets, controlling tables, technical reports. They will be shared in one package to all partners at M2			
Deliverable D.M.2.2	Project Handbook		1,00
Project internal Guide that summary objectives, deliverables, outputs, tasks and responsibilities, deadlines, Meetings/workshops dates & places, Gantt chart, rules and procedures for reporting, subcontracting, communication, eligibility rules etc			
Activity A.M.3	Partners reporting and contribution to periodic reports	2018.04	2021.04
All partners will prepare&report their efforts, personnel costs and expenses on a quarterly basis to P2 financial manager, following project tables & timesheets specially developed in the Management Package: preparation of tables/timesheets, documents needed for audit trails per cost category, preparation of explanations & potential corrections. In addition, partners submit each month an implementation report per activity to WP leaders who report to Coordinator & contributes to periodic reports			
Activity A.M.5	Project closure	2021.02	2021.04
P2 will plan in detail the ending tasks of ASIS & manage them until submission of all final reports = retroplanning for the tasks closure, deliverables finalization, preparation of final reports, first level control of expenditures. Preparation of the Final evaluation of ASIS with success indicators. Preparation of an Impact Action plan for post project management & communication to guarantee durability of results & outputs. Partners stay available after closure date for any programme questions.			
Deliverable D.M.5.1	Final evaluation		1,00
Evaluation of the project regarding success indicators defined during the kick off and regularly updated by SC. Study of the strenght and weakness of the project and possibility of progress in further Alpine cooperations			
Deliverable D.M.5.2	Impact Action Plan		1,00
Definition of responsibilities & tasks after the project, to ensure durability of ASIS outputs & results and increase ASIS impact.			

Type: Implementation

Summary description and objectives of the work package including explanation of how partners will be involved.					
There are various concepts and definitions of SI.The main objective is to produce a common knowledge base & innovative definition in ASP area in order to apply and replicate SI policies actions and support by project partners and furthermore other organisations/regions outside of the current partnership. It will help partners & other private/public organisations to share & disseminate SI vision. Partners will propose a new & shared vision of innovation that really answer societal challenges.					
Please describe project outputs that will be delivered based on the activities carried out in this work package. For each project output a programme output indicator should be chosen. Please note that they need to have the same measurement unit.					
Project output		Describe your project output	Choose a programme indicator to which the project output will contribute	Target	Delivery Date
O.T1.1	A new and shared SI concept	Produce a report putting together stakeholders' understanding of SI (cf. academics, politic authorities agencies, firms...) and create a common new vision & definition of SI concept applied to ASP: main issues & challenges associated with SI orientations	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2019-04

Target groups per outputs			
Who will use the outputs delivered in this work package?		<ul style="list-style-type: none">• local public authority• regional public authority• national public authority• sectoral agency• higher education and research• business support organisation	
How will you involve target groups (and other shareholders) in the development of the project outputs?		Academics, political authorities, business support organisations and agencies will be interviewed and questioned to understand dimensions and criteria they operate to define properly SI issues, projects, businesses... Individual interviews and focus groups will be organised to delineate precisely their perspective and understanding but also to confront outlooks. Then, the output (innovative vision of SI) will be submitted to target groups to have their feedbacks and suggestions.	
Durability and transferability of outputs			
How will the project outputs be further used once the project has been finalised? Please describe concrete measures (including e.g. institutional structures, financial sources etc.) taken during and/or after project implementation to ensure the durability of the project outputs. If relevant, please explain which project partner will be responsible and/or the owner of the output.		Drawing up a report clarifying SI concept will be a cornerstone and a prerequisite *to support further academic publications *to disseminate SI vision among public authorities and sectoral economic agencies in ASP *to define specific training programs (cf. WP3&6) to promote and develop SI skills among further generations of socioeconomic actors WP goal is to propose a vision for the future: dissemination activities, tools developed & trainings organized are essential to ensure durability	
How will the project ensure that the project outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.		This output aims to initiate and formalize a knowledge base on SI, to design new knowledges and to expand a dynamic knowledge management about SI Further ahead, this common definition of SI concept is a prerequisite to propose new public policies and support schemes shared by many public authorities & support organizations and easily replicable by others. The consensus ASIS would like to create on this SI vision will ensure the transferability at regional level and in the other countries.	
Please describe activities and deliverables within the work package			
Activity A.T1.1	Definition of the shared methodology of work	2018.04	2018.06
At this stage, the objective will be * to identify public authorities, business support organizations and economic agencies that will be approached for interviews and focus groups * to define and develop data collection tools * to identify proper members of the project to conduct interviews and focus groups in each territories and to plan different data collection phases P1 will propose the methodology that will be discussed and approved by all partners.			
Deliverable D.T1.1.1	The Methodology guide for a SI vision		1,00
The methodology proposed and accepted by all will be presented in a single report, finalized at Month 2.			
Activity A.T1.2	Study of actual definitions of SI in each territory involved	2018.06	2018.11
Different reflection phases will be considered * Definition of a transversal vision of SI from academic and socioeconomic literatures * Delineations of SI vision for each territory but also identification of specific issues and challenges about SI according to territories This Study will be coordinated by P1 and realized for each region involved, with detailed analysis elements (grids, tools) in support of this study.			
Deliverable D.T1.2.1	SI analysis report		1,00
This report will include conclusionson the study of SI in each territory.			
Activity A.T1.3	Definition of common criteria and shared definition of SI	2018.11	2019.04
Based on data collected & analysis realized among territories, this step aims * to confront the transversal vision with specific territorial visions to identify common traits and to delineate a shared definition of SI concept * to propose & design innovative criteria & work to meet a consensus with partners and observers. * to qualify SI challenges & concept precisely with clear features & applicable elements.			
Deliverable D.T1.3.1	Report on new ASP SI visions		1,00
This report will gather all the researchs and innovative propositions made by ASIS for a new vision of innovation in ASP that is social innovation			

Type: Implementation

WP Nr	WP title	WP start date	WP end date	WP Budget
T2	An ASP Social Innovation Strategy to imagine to answer common challenges	2018-09	2019-10	161.914,00

Partner involvement

WP responsible partner	Municipality of Turin
Chair of entrepreneurship in Social and Solidarity Economy of Lyon2 University	LP
Carinthia University of Applied Sciences	PP
Steinbeis 2i Ltd	PP
DEVELOPMENT AGENCY KOZJANSKO	PP
Municipality of Turin	PP
Torino Chamber of commerce, industry, handcraft and agriculture	PP
City of Lyon	PP
Laboratory of visual culture - University of applied sciences and arts of Southern Switzerland (SUPSI)	PP

Summary description and objectives of the work package including explanation of how partners will be involved.

The objective is to go further the common vision of WPT1 by designing a coherent strategy of action, in link with the ASP territorial context. It aims to specify ASP challenges & issues & propose strategic orientations among ASP actors & territories & promote a collective appropriation of SI. The strategy concerns the way to incentive the emergence of SI in ASP territories but also aims to organize the coherence & the governance of SI supports, to answer collectively to ASP societal challenges.

Please describe project outputs that will be delivered based on the activities carried out in this work package. For each project output a programme output indicator should be chosen. Please note that they need to have the same measurement unit.

Project output		Describe your project output	Choose a programme indicator to which the project output will contribute	Target	Delivery Date
O.T2.1	Proposition of a shared ASP strategy framework	This output contributes to the SO1 by defining a common strategy framework, elaborate strategic recommendations, proposing a collective appropriation of SI and create a common culture to better answer societal & economic ASP challenges	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2019-04

Target groups per outputs			
Who will use the outputs delivered in this work package?		<ul style="list-style-type: none">• local public authority• regional public authority• national public authority• higher education and research• Other	
How will you involve target groups (and other shareholders) in the development of the project outputs?		1. Exploration phase with target groups & ASP Interreg programme (surveys) to well identify ASP challenges & benchmark in non ASP countries to better understand ASP specificities. 2. Determine with target groups how SI new vision can answer identified ASP challenges & issues (online & physical workshops). 3. Propose collective measures ASP regions can implement in the following years. 4. Elaborate a Proposition of a shared ASP strategy framework: Strategic recommendations&SI ASP orientations	
Durability and transferability of outputs			
How will the project outputs be further used once the project has been finalised? Please describe concrete measures (including e.g. institutional structures, financial sources etc.) taken during and/or after project implementation to ensure the durability of the project outputs. If relevant, please explain which project partner willbe responsible and/or the owner of the output.		Propositions made by this WPT2 are a first step to define and test further ASP actions and public policies in the following years. Target groups and ASP programme will be mobilized by the partners on that topic during and after the project to continue discussions/thinking on that topic and transform these strategic policies recommendations in concrete pilot actions then in transnational integrated policies. Promotion and dissemination activities will have a crucial role to guarantee durability.	
How will the project ensure that the project outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.		Other organisations and regions will be invited to participate to the surveys and worksops of this WP, to involve them and take in account their strategic expectations and needs. Then, outputs and tools developed in WPT3 will be available and adapted to all: The benchmark in non ASP countries conducted to better identify the ASP specificities will allow to adapt the training programs to other regions.	
Please describe activities and deliverables within the work package			
Activity A.T2.1	Identification of the challenges and issues to which SI can answer in each territory	2018.09	2019.02
Analysis of the socio-economical & institutional contexts to underline challenges for SI: Survey on challenges & issues of ASP regions based on already existing researches & publications & potential new challenges identified in the meantime. Identification of the causes & effects, of the critical paths. Benchmark in other ASP regions to identify similarities/differences. Define first a collective frame analysis to identify these factors,then proceed to the collect of data & to the local analysis			
Deliverable D.T2.1.1	Report on ASP challenges SI can answer		1,00
all the researches and tasks of this activity will be gathered in a dedicated report finalized at M10			
Activity A.T2.2	Proposition of axes of cooperation and development on SI between ASP regions	2019.02	2019.06
ASIS partners will propose new axes of cooperation to better answer to ASP challenges through Social innovation. Strategic elements to impluse a macro regional change in public policies by making the link between the issues and the answer Social innovation can propose. Partners involved will identify what changes can be expected on these axes of cooperation. This step is fundamental to imagine a transnational & coordinated answer in a second time and not isolated policies.			
Activity A.T2.3	Proposition of a shared ASP strategy framework on SI	2019.06	2019.10
In line with the previous activity, partners will propose a clear ASP strategy framework, from the challenges to the transnational policies and actions that may be implemented to provide the more adapted answer and achieve efficient effects. This final proposition has to give concrete strategic elements to answer ASP needs, in order to well understand the potential effects of the strategy framework proposed. Awareness actions will be organized in parallel and during the whole project (WP C).			
Deliverable D.T2.3.1	Report on a shared ASP strategy framework		1,00
This report will gather all the propositions, linked to the ASP challenges and needs, and to the effects/impacts this new strategic framework can have.			

Type: Implementation

Summary description and objectives of the work package including explanation of how partners will be involved.

WP goal is to deliver strategic tools & methods to help business target groups to better support SI projects & improve cooperation between them: the WP will use knowledges created by WP1 & 2 to design trainings & guidelines. Partners will define first the content/format expected. Tools are developed by P1,4,5,6,8,10,12. Tools available on the web platform, the "Si Alpine portal" developed by P2, which will share outputs, events, cooperation opportunities. Testing phase & adaptation at the end

Please describe project outputs that will be delivered based on the activities carried out in this work package. For each project output a programme output indicator should be chosen. Please note that they need to have the same measurement unit.

Project output	Describe your project output	Choose a programme indicator to which the project output will contribute	Target	Delivery Date
O.T3.1	SI knowledge materials: trainings, guideline, platform	To allow support organizations & regional agencies to better understand SI concept & increase the quality of their actions on innovation & economic development, ASIS will provide them with detailed online trainings (8), guidelines (4) & the SI Alpine portal	OI1.1.3 - Number of developed implementation elements improving the framework conditions for innovation	12,00 2021-04

Target groups per outputs			
Who will use the outputs delivered in this work package?		<ul style="list-style-type: none">• local public authority• regional public authority• national public authority• sectoral agency• business support organisation	
How will you involve target groups (and other shareholders) in the development of the project outputs?		Most of ASIS observers are target groups representatives. They will be involved during WP T3 workshop at M21 in Germany to have their advices/recommendations on the contents and formats of trainings and guidelines. Then they will participate to the testing phase of the tools. Many other targets groups will be invited to participate to this testing phase (goal of 5 per region involved, total of 35 minimum).	
Durability and transferability of outputs			
How will the project outputs be further used once the project has been finalised? Please describe concrete measures (including e.g. institutional structures, financial sources etc.) taken during and/or after project implementation to ensure the durability of the project outputs. If relevant, please explain which project partner will be responsible and/or the owner of the output.		ASIS tools will be actively promoted/disseminated during all the project life, through annual public events, partners and osbervers networks (newsletters & mailings). SI school will be organized to guarantee the understanding & proper use of the tools. Tools will stay available to any public or private entities thanks to the SI Alpine portal. Promotion of the tools & portal will continue after the project end (including in communication strategy and Impact Action Plan of the project).	
How will the project ensure that the project outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.		ASIS tools are developed on a qualified state of the art and an innovative vision of social innovation adapted to Alpine regional challenges. They are directly applicable by any other organisations/public authorities, without any adaptation needed. If needed, partners will organize further workshops for target groups representative to ensure the proper use of these tools. ASIS is an experimentation. If we conclude to a success, a biggest change at public policies level will have to be boosted.	
Please describe activities and deliverables within the work package			
Activity A.T3.1	SI Alpine Portal	2019.04	2021.04
P2 will develop a platform dedicated to SI tools (trainings, guidelines) and any other support materials (video, presentation conferences, online newsletter etc). This platform will share freely all project outputs and will offer opportunities to better communicate between target groups involved thanks to a "private forum space", whose content will be defined with them at the beginning of this activity (open questionnaire on cooperation needs on SI)			
Deliverable D.T3.1.1	online platform		1,00
The deliverable is the platform developed and online with all the content available.			
Activity A.T3.2	Creation of online trainings: "ASIS MOOC"	2019.04	2020.07
Partners will define 8 topics of trainings that will be developed by P1, 4, 6 & 12 (2 per partners). These trainings will transfer new knowledges created in WPT1, T2, T4 and T5 and will be adapted to the different target groups. 2 workshops will allow potential corrections (M18 during mid-term meeting & M21). These "moocs" will use attractive/innovative format like prezi to encourage their use by target groups. They will be totally open data & accessible on ASIS platform			
Deliverable D.T3.2.1	ASIS MOOCS		8,00
The deliverable is all the trainings developed and finalized by the partners and accessible on the platform			
Activity A.T3.3	Creation of guidelines	2019.04	2020.07
Partners 5, 8, 10 & 12 will develop Guidelines on Si criteria, ASP SI strategy, SI funding schemes and SI strategic public policies. They will give methodologies on how to better support SI and how to define SI, with clear examples. Goal is not the same as for trainings that are for a larger public, to disseminate the results of the project pedagogically. Here, guidelines are technical documents, for a daily use by target groups and public authorities that follow and support innovation.			
Deliverable D.T3.3.1	Guidelines		4,00
Creation of 4 technical Guidelines that will share methodologies and detailed knowledge to target groups, through the platform.			
Activity A.T3.4	Testing phase of the tools and adaptation	2020.07	2021.04
All the partners will be involved in the testing phase of the tools. They will mobilize their networks & observers and invite them to use the outputs during 4 months . We estimate that around 35 support organizations/regional agencies, public authorities will participate to the testing phase. Proceedings of the test will be decided by consensus at the beginning of the activity and a workshop will be organized at M32 to share on needed adaptations/corrections identified thanks to a grid analysis.			
Deliverable D.T3.4.1	Testing phase analysis		1,00
Partners will gather the feedback from the testing entities, based on grid analysis, and will decide on the necessary corrections to increase impact & dissemination of the tools before the project end. This deliverable is a report written by WP leader.			

Type: Implementation

Summary description and objectives of the work package including explanation of how partners will be involved.

Objective is to improve Framework conditions by adaptation of funding principles to face economic&societal challenges in the context of a developed common SI Strategy W2&3.Outcomes are success factors, indicators & indices that may highlight SI as important Soft Location Factor.The Simulation model will use these social & economic factors to determine the influence to overall success of funded project. It will be tested in pilotregions P1&P3 & given access to all regions after implementation W6

Please describe project outputs that will be delivered based on the activities carried out in this work package. For each project output a programme output indicator should be chosen. Please note that they need to have the same measurement unit.

Project output		Describe your project output	Choose a programme indicator to which the project output will contribute	Target	Delivery Date
O.T4.1	Simulation model, Software and Handbook	Simulation model SO3: Impact of the selected policy measures on civil society&commercialisation is the main target. Single factors, which consider social&economic indicators are involved in the model & will determine influence on overall projects success	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2021-03
O.T4.2	Risk assessment simulation model and Evaluation QM-system	The scenario analysis (method for risk analysis) selects policy measures for innovative social strategies including risks&opportunities. The risk based simulation model is structured in the way to be integrated in a system of Evaluation Quality Management	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2021-03

Target groups per outputs	
Who will use the outputs delivered in this work package?	<ul style="list-style-type: none"> • local public authority • regional public authority • national public authority • sectoral agency • business support organisation
How will you involve target groups (and other shareholders) in the development of the project outputs?	Involvement through participation in the development process as observers & in piloting on a regional level, assessment of regional funding policies in terms of SI and its impact on regional development and societal challenge. Data collection that comprises quantitative data (related to project input and output) that comes from former AS project as well as qualitative data (survey and in-depth interviews of project members and stakeholders of former projects).
Durability and transferability of outputs	
How will the project outputs be further used once the project has been finalised? Please describe concrete measures (including e.g. institutional structures, financial sources etc.) taken during and/or after project implementation to ensure the durability of the project outputs. If relevant, please explain which project partner will be responsible and/or the owner of the output.	Outputs will be used by public authorities on a national, regional & local level, sectoral agencies & funding bodies for economic development as well as ASP program Committee itself. The user friendly simulation model can be accessed & downloaded via the platform on the website. It is available for public authorities, sectoral economic agencies & funding bodies. Continued improvement of the pre-defined Indicators is planned to allow for the further refinement & adaptation of funding principles.
How will the project ensure that the project outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.	Project builds on the common SI Strategy that will be generic in nature (developed in WP2+WP3) and will be adaptable to meet the specific conditions in other regions. (WP6). The Instrument, which evaluates the outcome of promising projects, that show innovation and sustainability and increased quality of parameters, will improve current funding schemes on Interreg level down to regional level in terms of pre-defined indicators

Please describe activities and deliverables within the work package			
Activity A.T4.1	State of the art of public funding policies	2019.01	2019.04
During this task, each partner will collect data of Innovation funding policies in their region based on their experience. Furthermore national funding schemes will be assessed accordingly in each region, to estimate the contribution of ERDF funds and additional financing (3rd party, crowd funding) for societal successful regional development. Beyond that P3 will analyse the performance of former AS project and will determine Factors of Success			
Deliverable D.T4.1.1	Report on state-of-the-art Innovation funding policies and on Success Factors		1,00
Determination of Success Factors according to societal successful regional development			
Activity A.T4.2	Methods & instruments Development	2019.04	2019.10
Determination what factors together form a cluster /success filter for innovation, success and sustainability. Work out of key indicators and creation of index to measure different forms of SI (dependent variable) as well as the respective determining factors (independent variables) to capture the heterogeneous nature of ERDF projects (also former ASP projects) to support a new common SI Strategy which may highlight SI as an important Soft Location Factor for EU Regional Competitiveness Index			
Deliverable D.T4.2.1	Report on methods and Instruments developed		1,00
Report covers Methods (Literature,statistical Analysis) and instruments (new factors, indicators, index) to be developed			
Activity A.T4.3	Simulation models development	2019.10	2020.07
It covers data development, design, generation, implementation (pilot) Development of the model and the transfer in a user-friendly software-solution. Monitoring, evaluation and validation (PP & stakeholders). Development of an instrument to facilitate selection of promising projects to guarantee innovation, sustainability of projects and increase quality by incorporating parameters to be met to come to an improvement of funding schemes on national/regional level with pre-defined indicators.			
Deliverable D.T4.3.1	Simulation Model,Software and Handbook		1,00
For simulating the impact of selected policy measures on civil society and commercialisation. Also the influence of single factors on the overall success of funded projects can be determined. Social and economic indicators will be involved in the model			
Activity A.T4.4	Risk assessment simulation model and Evaluation QM-system	2019.10	2020.07
Risk assessment in terms of risk identification, analysis and evaluation with well-defined system in background helps public authorities, sectoral economical promotion and funding agencies to find out the sincerity of projects. It evaluates uncertainty on objectives before project start. Within the risk assessment system there are different methods as support. Results help integrating qualitative&quantitative aspects minimizing uncertainty. Development of Evaluation QM-System for comparability			
Deliverable D.T4.4.1	Risk assessment and Evaluation QM System – tool.		1,00
This tool is supporting the Simulation model in terms of risk assessment and Quality performance. It provides comparable results in terms of a common SI Strategy.			
Activity A.T4.5	Testing phase and implementation	2020.07	2021.04
The newly-developed user-friendly software will be tested in a pilot during 1 yr on a regional scale in Carinthia region & Rhone Alps region. After successful completion trainings will take place for other project partners as well as the responsible public authorities, sectoral economic agencies and funding agencies			
Deliverable D.T4.5.1	Report on Testing phase and implementation		1,00
Pilot action (implementation, monitoring evaluation and validation), Launch on website and training of all regional partners and/or QM evaluation team			

Type: Implementation

WP Nr	WP title	WP start date	WP end date	WP Budget
T5	Adaptation of public policies to SI challenges	2019-01	2021-04	236.006,82
Partner involvement				
WP responsible partner		Cultural and Economic centre of European Space technologies		
Chair of entrepreneurship in Social and Solidatity Economy of Lyon2 University		LP		
OXALIS SCOP		PP		
Carinthia University of Applied Sciences		PP		
Steinbeis 2i Ltd		PP		
Cultural and Economic centre of European Space technologies		PP		
Municipality of Turin		PP		
City of Lyon		PP		
Laboratory of visual culture - University of applied sciences and arts of Southern Switzerland (SUPSI)		PP		
Summary description and objectives of the work package including explanation of how partners will be involved.				
WP objective is to develop new strategic actions that can be implemented by national/regional/local public authorities to support/encourage SI on their territories, to increase innovation capacities and visibility of SI ,to identify state of the art of public policies with mapping of existing public instruments & policies, to contribute to design of new strategic policies on SI at regional/local levels, to design of an operational ASP SI strategy, to implement SI schools for public authorities.				

Please describe project outputs that will be delivered based on the activities carried out in this work package. For each project output a programme output indicator should be chosen. Please note that they need to have the same measurement unit.

Project output		Describe your project output	Choose a programme indicator to which the project output will contribute	Target	Delivery Date
O.T5.1	White book on SI public policies	This White Book will gather all the new strategic actions/instruments proposed by ASIS, with concrete implementation methodologies and procedures to encourage the dissemination of this output.	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2020-04
			OI1.1.3 - Number of developed implementation elements improving the framework conditions for innovation	1,00	2020-04
O.T5.2	Operational SI ASP strategy	ASIS will propose a concrete ASP strategy, based on the regional SI strategies proposed in A.T5.2. It goes further than strategic recommendations of WPT2 proposed 2 years before this output. At this project time, public policies are more ready to change!	OI1.1.2 - Number of developed strategic elements improving the framework conditions for innovation	1,00	2020-10
			OI1.1.3 - Number of developed implementation elements improving the framework conditions for innovation	1,00	2020-10

Target groups per outputs	
Who will use the outputs delivered in this work package?	<ul style="list-style-type: none"> • local public authority • regional public authority • national public authority • sectoral agency • interest groups including NGOs • higher education and research • enterprise, excluding SME • SME • business support organisation • Other
How will you involve target groups (and other shareholders) in the development of the project outputs?	Public institutions, authorities & funding providers will be involved in the phase of mapping, of analysis, in the phase of defining conclusions & recommendations of the analysis, in proposals of improvement of existing policies & of new ones & in phase of implementing SI schools for public authorities. Research & academic institutions in the phase of analysis & preparation of the strategy & policy recommendations. ASP will be consulted for A.T5.3 & Companies too to better understand their needs
Durability and transferability of outputs	
How will the project outputs be further used once the project has been finalised? Please describe concrete measures (including e.g. institutional structures, financial sources etc.) taken during and/or after project implementation to ensure the durability of the project outputs. If relevant, please explain which project partner will be responsible and/or the owner of the output.	ASIS outputs will be used in the preparation of improvement of existing policies, and creation of common strategic policies on SI for ASP region. SI schools will be provided in different regions to exchange practices on existing policies & transfer the new ones. Outputs will be available on ASIS platform. If ASIS pilot actions & recommendations are a success, a new project for public policies implementation will be created to continue the work at ASP level
How will the project ensure that the project outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.	Applicability will be ensured by concrete recommendations of best practices & strategic instruments for public policies of regions/countries facing societal & economic challenges. ASIS strategic policies will be presented to EU networks & expert groups & proposed for policy making process at EU level. SI schools & ASIS events will be open to other regions to allow replicability. ASIS will propose in case of success a second project with detailed pilot actions & policy implementation activities

Please describe activities and deliverables within the work package			
Activity A.T5.1	State of the art of public policies on SI at regional and local levels	2019.01	2019.06
WP objective is to identify horizontal & vertical aspects of the state of the art of public policies/instruments: mapping of existing public policies & types of SI incubation from start up to scale up phase in ASP territories, using bottom up principle (from local authorities/institutions on local levels to regional level) & in accordance with the source of financing (local & regional budgets, public financing of the institutions using public procurement for SI projects or EU structural funds)			
Deliverable D.T5.1.1	Analysis of state of the art		1,00
Analysis will be prepared in cooperation with public & private stakeholders (local/regional/national authorities, business sector & academia). Mapping, identification of existing instruments & qualified grid analysis. Workshops with relevant observers.			
Activity A.T5.2	Design of new strategic policies on SI at regional and local levels	2019.06	2020.03
Using outcomes of mapping & analysis, partners will define methodologies to implement bottom up approach that will help creation of adequate framework for development of suitable support policies for SI. Proposition of new policy orientations, instruments & methods. Consultation of all target groups to design the most adapted strategies, with dedicated questionnaires for each, before & after the design of new policies: evaluation of questionnaire & test of most relevant instruments on opinion.			
Deliverable D.T5.2.1	Methodologies definition to improve existing and develop new policies to support SI		1,00
Methods will be defined for the creation of the framework for the improvement of existing policies and development of new policies, better responding to the needs of SI and stakeholders promoting SI there will be defined methods for 5 pilot areas.			
Deliverable D.T5.2.2	ASIS strategic public policies Guide		1,00
This Guide will present the conclusions resulting from the target groups questionnaires & of the testing phases, then the new/more suitable policy instruments & methods to give to innovation the expected effects/impacts on economic & societal challenges			
Activity A.T5.3	Design of a common SI strategy at ASP level	2020.03	2020.10
Partners will define logical framework for introduction of new ASIS strategic policies & instruments in all ASP regions, facing similar challenges, in the co-creation process, including institutions, local and regional/national authorities, academia stakeholders and business sector. Interdisciplinary working groups will be created (using ASIS online platform) to design a concrete shared ASP strategy for SI, which can improve visibility of SI and its access to finance and to market.			
Deliverable D.T5.3.1	Development of logical framework for implementation new ASIS policies and instruments to support SI		1,00
1 logical framework will be developed for integration of ASIS new policy/instruments into a ASP shared strategy to support SI, with objectives & indicators to increase visibility, access to market and to finance for SI in the pre- and incubation phases			
Deliverable D.T5.3.2	A shared SI strategy for ASP regions		1,00
This report will gather the conclusions of the working groups, the logical framework & the shared strategy proposed by ASIS to design and implement SI as the new vision of innovation to answer societal & economic development ASP challenges for the future			
Activity A.T5.4	SI schools for public actors	2020.10	2021.04
SI schools will be organized (2 per ASIS region) for public actors (national, regional & local) to support results & outputs transfer and make strategies proposed well understood. Creation of mixed teams to share on respective challenges. SI schools goal is to boost outputs appropriation by all the concerned public actors & give them the keys to use the tools and methods proposed. It will allow them to change their mind on social innovation & become actors of this new way to see innovation.			
Deliverable D.T5.4.1	SI schools book		1,00
Partners will develop a training book/ pedagogic materials that will be used for each SI school (2 days per school and 2 schools per region), to better present ASIS new public strategies, tools and impacts to public actors.			

Type: Communication

Please indicate main objectives of the work package, as well as its linkage to the other work packages and provide a short description of the main activities.				
<p>This WP covers all the communication actions that will be the key of ASIS success. Communication related to internal exchanges and implementation is included in the other WPs. The goal of this WP is to ensure an efficient communication strategy, the transfer of outputs and durability of results and a great visibility/promotion of the project at national and regional level. All partners are involved to ensure a high quality communication and specific tasks will be shared between partners. A Communication Strategic Plan will be prepared at the beginning of the project, with promotional materials and project document with logos and branding. Then, ASIS project will implement a website and social medias (facebook, twitter) to communicate on a regular basis on the project outputs and improve their transfers. Annual public events will be organized in addition to the final event to allow an efficient transfer and an adapted communication during the whole project duration</p>				

Project specific objectives	Communication objectives - What can communications do to reach a specific project objective?	Approach/Tactics - How do you plan to reach the communication objective?
SO1: To provide public authorities, business support organisations & sectoral agencies with common criterias/concept of SI between ASP regions in order to create a common vision of SI & initiate 1st steps to develop a shared SI strategy for economic devpt	Increase knowledge	Disseminate the new vision of social innovation to all target groups, thanks to the platform, the website and the digital activities. This dissemination will increase knowledge or create new knowledge for the target groups. The newsletter will disseminate on a regular basis the knowledge developed in ASIS project.
SO 2: Propose new tools, methodologies and guidelines in order to help business support organisations and sectoral agencies to better support sustainable and Social Innovation projects and improve cooperation between them on that topic	Raise awareness	Transfer of project outputs of WP 4 to the target groups = regular information on the tools and guidelines developed through the newsletters, the social media. Then, the organization of public events in each region on an annual basis will contribute actively to the transfer of project outputs, with workshops and seminars to well present and test the outputs.
SO 3: Give recommendations to public authorities on how to adapt public policies to social innovation challenges through a « white book » and how to support funding bodies in a new approach of funding principles	Influence attitude	The communication of the outputs of SO3 will influence public authorities by encouraging them to change/adapt the policies dedicated to innovation support and to innovation funding. The target groups that are local and regional public authorities will receive dedicated newsletters to inform them about the development and achievement of the outputs and they will be invited to the public events organized during all the project duration to better adopt the outputs through workshops/seminars.

Please describe activities and deliverables within the work package			
Activity A.C.1	Digital activities	2018.04	2021.04
All connected actions to promote the project = -creation of a twitter account & a facebook page to communicate on a weekly basis on project outputs & events. P2 Oxalis will update and animate social medias & will make available partners information during the whole project duration for all target groups who will follow the publications on these medias. -Development of a promotional video on ASIS objectives & outputs to promote ASIS and publication on partners & project websites/social medias			
Deliverable D.C.1.1	Facebook page and twitter account		1.000,00
creation of a facebook page to fully disseminate to any public - 1000 followers at least at the enf of the project			
Deliverable D.C.1.2	Promotional video		1,00
Development of a promotional video in english (with subtitles for each Alpine country), of around 5 minutes that presents pedagogically what is social innovation in Alpine Space and what are the tools, methods, recommandations available for target groups.			
Deliverable D.C.1.3	ASIS Website		1,00
The website is provided by the programme and will be regularly updated on a monthly basis by P2, thanks to partners contributions.			
Activity A.C.2	Publication(s)	2018.08	2021.04
ASIS Newsletter edited at the consortium level on a 6 monthly basis, developed in english by P5 and translated & disseminated at regional level to the respective network and target groups in each project region. Scientific publications of the universities on an annual basis on the project outputs and results. Publications in regional and local relevant papers, at least 2 per year per involved region = the goal is to disseminate very largely to all entities concerned by social innovation			
Deliverable D.C.2.1	Newsletters		6,00
newsletters will be prepared by P5 and disseminated by all in their respective networks in order to reach all target groups at regional and local level, on a 6 monthly basis.			
Deliverable D.C.2.2	Publications report		3,00
Report on an annual basis that gather all the publications of the partners edited during the year.			
Activity A.C.3	Public Event(s)	2019.01	2021.04
-Annual public events: Partners will organize a regional public event each year to inform about ASIS outputs, with conferences, seminars & workshops which will involve observers, stakeholders & target groups. The goal is to communicate directly with the concerned entities, better explain ASIS objectives & increase significantly the transfer of results by testing outputs on target groups. -Final public event organized in Lyon with many dissimination & transfer activities. all partner			
Deliverable D.C.3.1	Report on public events		3,00
Summary report on the conferences presented during public events organized each year by the partners.			
Activity A.C.4	Start-up activities including communication s	2018.04	2021.04
- definition of the Communication Strategic Plan from month 1 to month 3, drafted by Oxalis and validated by all the partners: definition of the tasks, the responsibilities, the calendar & steps. Main information will be summarized in parallel in the Project handbook (WP1) - Set up & implementation of ASIS website, regular updates with projets information (outputs, meetings, events, deliverables),all partners will propose contents when relevant and Oxalis will be in charge of updates.			
Deliverable D.C.4.1	Communication Strategic Plan		1,00
Description of the Communication Strategic Plan of ASIS project, proposed by Oxalis then discussed and validated by all partners.			
Activity A.C.5	Promotional activities	2018.04	2018.10
- preparation, validation, and printing of ASIS project logo. ASIS logo will be based on the Interreg Alpine Space logo. - preparation of all project documents (reports, agends, minutes etc) with mandatory logos, branding of the programme, references to ERDF - preparation of project poster - add of project information on project partners' websites - creation of specific pormotional materials for public events/conferences= Cardboard conference folders, note blocks and pens. No usb.			
Deliverable D.C.5.1	ASIS logo		1,00
creation of the logo of ASIS project			
Deliverable D.C.5.2	project documents with mandatory information		1,00
all the project documents will be preped and send in one folder to all partners as the Communication documents package to use for all the project duration			
Deliverable D.C.5.3	Project poster		1,00
preparation of the project poster for month 3 at the latest			

C.5.1 Periods

Period Number	Duration (month)	Start Date	End Date
0	12	2017-04-19	2018-04-19
1	8	2018-04-17	2018-12-31
2	6	2019-01-01	2019-06-30
3	6	2019-07-01	2019-12-31
4	6	2020-01-01	2020-06-30
5	6	2020-07-01	2020-12-31
6	3	2021-01-01	2021-04-16

C.6 Activities outside the Union part of the programme area

If applicable, please list activities to be carried out outside (the Union part of) the programme area. Describe how these activities will benefit the programme area. What is the added value of activities to be carried out outside (the Union part of) programme area? If applicable, please list the relevant activities and describe how they will benefit the programme area.

Total budget	0,00
ERDF outside	0,00
% of total (indicative)	0,00

C.7 Indicative time plan
